WCSR, Smith College
10 Prospect St.
Northampton, Mass.

Dear Miss Butler,

I have communicated to the members of the Harvard Radio Network your invitation to come to WCSR for an evening's broadcasting and whatever else may ensue. The response has been definitely positive. We are all very interested in your idea and hope that it will be successful. Of course, we extend a similar invitation to your station.

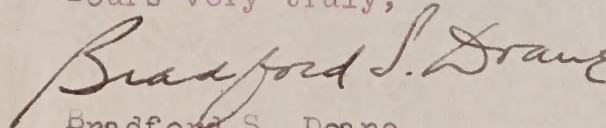

WHRB is at present caught up in the turmoil of beginning a new term on the air, including running the usual competition for prospective members. We are also quite busy with extensive renovation of our studios and studio equipment and are making a concentrated effort to start this year off with the highest possible quality of production and programming. For these reasons we will not be able to consider tentative dates for several weeks, but as soon as possible I will start making arrangements.

Our programming department has already begun considering ideas for shows which we can bring to Smith. I hope we can live up to your expectations.

I'm sorry that it is impossible to be more definite at this time, but please write and tell me any particulars, such as preferable days of the week, which you think important.

I hope you have a pleasant season of broadcasting this year and thank you for thinking of us.

Yours very truly,

Bradford S. Doane
President
